01st SEPTEMBER, 2017 – 17th SEPTEMBER, 2017

TIME : 2:00 P.M. TO 5:00 P.M.

DURATION : 36 HRS

About the College

S.I.W.S. is a premier institution having a glorious history of 84 years. Over the years the institution has grown by leaps and bounds by expanding from K.G. to Ph.D. The college runs B.Com. & B.Sc. (Aided) along with self-financing courses - B.M.S., B.Com. (Accountancy & Finance), B.Com. (Banking and Insurance), B.M.M., B.Sc.(I.T.), B.Sc.(C.S.), M.Com., M.Sc. & Ph.D. in Business Economics.

With the launch of self-financing courses, there has been a professional approach in imparting knowledge and information so as to bring out the fullest potential of the students.

Our motto, 'Vidya Dhanam Sarva Dhanath Pradhanam' is the driving force that motivates us in all our endeavours

**LINUX
ADMINISTRATION**

Course Overview :

In this course, Getting Started with Linux, you will learn the basics of installing and managing Linux systems. First, you will introduce yourself to finding and working with Linux distributions, desktops, and open source software. Next, you will learn to control and optimize the Linux runtime environment. Finally, you will use both physical and virtual Linux instances to install and manage server applications like the Apache HTTP web server and the Nextcloud file sharing suite.

When you've finished this course, you will have the skills and knowledge to plan, deploy, and administrate your own simple desktop and server Linux machines.

SUMMARY REPORT

Short Term Course in "Fundamentals of Robotics"

NAME & BRIEF ABOUT COURSE

IQAC & The Department Of Computer Science organized a Short Term Course in "Fundamentals of Robotics" from 1st December, 2017 to 15th December, 2017. It was a two-week program and was conducted from 2 p.m. to 5 p.m(33 Hours). The Introduction to Robotics Course introduces you to the concepts of robot flight and movement, how robots perceive their environment, and how they adjust their movements to avoid obstacles, navigate difficult terrains and accomplish complex tasks such as construction and disaster recovery.

OBJECTIVE

Students were exposed to real world examples of how robots have been applied in disaster situations, how they have made advances in human health care and what their future capabilities will be. They also learnt how to program a robot to perform a variety of movements such as flying and grasping objects.

DURATION & DATE

1st December, 2017 to 15th December, 2017 and was conducted from 2 p.m. to 5 p.m(33 Hours).

NO OF STUDENTS ENROLLED : 26

NO OF STUDENTS QUALIFIED : 26

MODULES

1. Robotics-Introduction
2. Grippers
3. Intranet Services
4. Application of Automation and Robotic

The course modules were elaborated by Prof. Santha Maria Rani for 33 hours.

EVALUATION METHOD

26 Students were evaluated on a Seminar and Case study based on current trends in robotics to understand the depth of concept of robotics.

PC Hardware is a study of the basic assembly, maintenance, and repair of microcomputer systems. Divided into eight (8) units, these hardware-oriented topics included subcomponents, such as system board, video, memory, storage, multimedia, networking, and printers.

DURATION & DATE

8th January, 2018 to 20th January, 2018(36 Hours).

NO OF STUDENTS ENROLLED : 25

NO OF STUDENTS QUALIFIED : 25

MODULES

1. Introduction to PC Hardware and processor
2. BIOS Configuration and OS installation
3. Device driver configuration, POST

The course modules were conducted by Prof. Smita Sawant.

EVALUATION METHOD

Case study and presentation based on future computer technology trends to showcase depth of understanding after course. (24 students)

RESOURCE PERSON

Prof. Smita Sawant.

OUTCOME

Follow a step-by-step guide to all you need to know when assembling a PC and RAM, Windows 8 installation and BIOS and UEFI settings.

Become familiar with many different device connections, how to connect them to your computer, and how to trouble the issues that may arise.

Review troubleshooting some of the most common problems that may occur with the motherboard, CPU, and RAM.

Learn how to troubleshoot HDD and RAID as well as become familiar with the troubleshooting tools at your disposal.

Apply your knowledge throughout the course with quick quizzes.

Participate in active discussions with other information technology students & participants becoming certified.

Communicate with the instructor and openly ask questions that will be addressed!

About the College

S.I.W.S. is a premier institution having a glorious history of 84 years. Over the years the institution has grown by leaps and bounds by expanding from K.G. to Ph.D. The college runs B.Com. & B.Sc. (Aided) along with self - financing courses - B.M.S., B.Com. (Accountancy & Finance), B.Com. (Banking and Insurance), B.M.M., B.Sc.(I.T.), B.Sc.(C.S.), M.Com., M.Sc. & Ph.D. in Business Economics.

With the launch of self-financing courses, there has been a professional approach in imparting knowledge and information so as to bring out the fullest potential of the students.

Our motto, 'Vidya Dhanam Sarva Dhanath Pradhanam' is the driving force that motivates us in all our endeavours

Eligibility Criteria

- Students from all streams can apply.
- Attendance in all the Sessions is compulsory to get the final certificate

Evaluation Method

Evaluation and Certification would be based on the scores obtained by candidates during the test conducted in session and on the submission of final project.

Multiple Choice Questions (MCQ) Test would be conducted at the end of each module.

Candidates who fail to attend the sessions or not submitted the projects will not be awarded with the Certificate.

Outcome

Participants will learn Practical Ethical Hacking and Penetration Testing Skills

Participants will be able to set up a Hacking Lab.

Participants will learn about the tools used for Cracking Passwords.

Prospects

The world is changing, constantly, and at a fast pace! The technology-driven future is filled with promise but also challenges. The course offers network security principles that will last for years to come using a practical approach but without neglecting the theory which is the base of a deep understanding.

Given the surge in the cyber-security threats, millions of new jobs are available across the industry and the global digital security spending is exceeding hundreds of billions of dollars in the years to come.

Name of the Certificate Course:

Certificate Course on **Android using Kotlin**

Course Duration:

6 Lectures - Monday to Friday- 1 weeks Program - 30 Hours- 10a.m. to 5 p.m.

Introduction

The Certificate Course on Android using Kotlin introduces the participants to field of Android and its Technologies.

The syllabus of the course on Android using Kotlin is designed to provide an understanding of mobile application development on Android platform using Kotlin Programming Language.

Participants will be trained from basics of app development concepts to advance programming using android studio.

This certification program encompasses theoretical aspects as well as hands-on training to familiarize participants with various techniques and tools of Mobile App Development that are applied today in various sectors.

Objectives:

- Provide knowledge on emerging field of Android Mobile App Development
- Enhancing logical thinking by developing programming skills using Kotlin Language

Eligibility Criteria

- Students from all streams can apply.
- Attendance in all the Sessions is compulsory to get the final certificate

Evaluation Method

Evaluation and Certification would be based on the scores obtained by candidates during the test conducted in session and on the submission of final project.

Multiple Choice Questions (MCQ) Test would be conducted at the end of each module.

Candidates who fail to attend the sessions or not submitted the projects will not be awarded with the Certificate.

Outcome

- Participants will be able to build a cloud-connected Android app, and understand the tools, principles, and patterns that underlie all Android development.
- Participants will understand the challenges associated with developing for the mobile environment and how to overcome them.
- Participants will learn how to build a great user experience for Android devices, and apply this knowledge to their own projects.

Prospects

Android development is a software creation process that focuses on applications, better known as apps, that are compatible with devices running the Android operating system (OS). Because Android is an open-source project, developers have easy access to the Android software development kit (SDK). Many use this kit in conjunction with Kotlin, Java, and C++ programming languages to make their apps.

The Android SDK tools compile your code along with any data and resource files into an APK, or Android package, which is an archive file that uses an .apk suffix. One APK file contains all Android app contents used by devices to install your app. When the app is complete and ready for release, Android developers can upload their apps to the Google Play Store for users to download.

Eligibility Criteria

- Students from all streams can apply.
- Attendance in all the Sessions is compulsory to get the final certificate

Evaluation Method

Evaluation and Certification would be based on the scores obtained by candidates during the test conducted in session and on the submission of final project.

Multiple Choice Questions (MCQ) Test would be conducted at the end of each module.

Candidates who fail to attend the sessions or not submitted the projects will not be awarded with the Certificate.

Outcome

- Participants will be work on Anaconda Environment and jupyter notebook.
- Participants will be able to conceptualize and apply programming logics using Python.
- Participants will gain the overview of Statistics and Data Science.

Prospects

Data science is a multidisciplinary approach to extracting actionable insights from the large and ever-increasing volumes of data collected and created by today's organizations. Data science encompasses preparing data for analysis and processing, performing advanced data analysis, and presenting the results to reveal patterns and enable stakeholders to draw informed conclusions.

As a result, data scientists (as data science practitioners are called) require computer science and pure science skills beyond those of a typical data analyst. A data scientist is able to do the following:

- Apply mathematics, statistics, and the scientific method
- Use a wide range of tools and techniques for evaluating and preparing data—everything from SQL to data mining to data integration methods
- Extract insights from data using predictive analytics and artificial intelligence (AI), including machine learning and deep learning models
- Write applications that automate data processing and calculations
- Tell—and illustrate—stories that clearly convey the meaning of results to decision-makers and stakeholders at every level of technical knowledge and understanding

Name of the Certificate Course:

Certificate Course on C# and Unity.

Course Duration:

6 Lectures - Monday to Friday- 1 weeks Program - 30 Hours- 10a.m. to 5 p.m.

Introduction

The Certificate Course on C# and Unity introduces the participants to field of Object Oriented Scripting Language which is used in field of Game Programming.

This certificate course is intended for beginners to understand how to program Unity games using C#. The C# and Unity material in the courses is slightly more comprehensive.

“Unity” is a trademark or registered trademark of Unity Technologies or its affiliates in the U.S. and elsewhere. The courses are independent works and are not sponsored by, authorized by, or affiliated with Unity Technologies or its affiliates

Objectives:

- Provide knowledge on Game Development using Unity.
- Enhancing creativity by developing designing skills and programming skills.

Eligibility Criteria

- Students from all streams can apply.
- Attendance in all the Sessions is compulsory to get the final certificate

Evaluation Method

Evaluation and Certification would be based on the scores obtained by candidates during the test conducted in session and on the submission of final project.

Multiple Choice Questions (MCQ) Test would be conducted at the end of each module.

Candidates who fail to attend the sessions or not submitted the projects will not be awarded with the Certificate.

Outcome

- Participants will be able to comprehend the dynamics of game development.
- Participants will be able to conceptualize and apply programming logics using C#.
- Participants will be able to develop simple games using unity.

Prospects

C-sharp (C#) is a popular programming language developed by Microsoft in 2002. It has also been a main language for Unity game engine since 2005. Unity3D, being one of the two main obvious choices for AR/VR development (apart from Unreal Engine by Epic Games), requires for AR/VR learners to get a handle of it if they want to develop applications with some complexity (think physics, animations, to design patterns, shaders or even sound effects).

Unity offers many features out of the box, and you can get even more from the asset store or similar places. Understanding C# will broaden your horizons and give you the ability to create custom and complex features, unlocking the full potential of the Unity game development 3D engine. Even if you don't plan to become a programmer, it is important to understand what can be done with coding.

Unity is a cross-platform game engine which means your applications made with Unity can live on multiple platforms - from gaming pc desktops, consoles (PlayStation, Xbox), mobile (android and iOS) and of course, AR/VR platforms (steam VR, Oculus Play Store, Circuit Steam Platform, ...).
